### Product Advantages

Kedel recycled mixed plastic planks, decking, cladding, and battens are the ideal alternative to traditional building materials.

- ◆ Strong and robust
- ◆ Maintenance free
- ◆ Uniform dimensions
- ◆ Consistent - no knots or splits
- ◆ UV stable and insect resistant
- ◆ Impervious to water and resistant to algae
- ◆ Does not crack, split, chip or break
- ◆ Requires no toxic preservatives
- ◆ Handles like wood - can be sawn, drilled, nailed, screwed and stapled

### British Innovative Recycling Technology

Our recycled plastic comes from mixed plastic waste destined for landfill or incineration.

We source ALL our waste plastic from UK businesses and home collections.

We do not import plastic from Asia which has a huge carbon footprint due to transportation.

It's all your waste plastic turned into something useful and innovative.

- ◆ 100% Recycled
- ◆ 100% Recyclable
- ◆ Our recycled plastic produces 1.66 tonnes less CO2 than production of virgin plastic
